PRODUCT/SERVICE BACKGROUND INFORMATION

We accelerate innovation. Alchemy's lab automation and scientific Alchemy solutions help cosmetic scientists accelerate R&D, product development, testing, and more. Data is tracked at every step of every process in our integrated data architecture so that you can connect every ingredient and formulation with any test result. The interconnected data feeds directly into Alchemy's scientific AI models. This gives lab teams real-time AI insights, recommendations, and predicted properties as they are formulating and testing.

WHAT IS THE COMPANY INTRODUCING TO THE MARKET/INDUSTRY?

Cosmetic scientists juggle multiple product development activities through cumbersome and disconnected tools that drain collective energy, delay product launches, and leaves everyone frustrated. We know that there is a better lab data management strategy that allows companies to execute work faster, leverage information over time, and access lab work from anywhere around the globe in a system that is easy to use.

HOW WILL THIS NEW PRODUCT/SERVICE IMPACT THE INDUSTRY (BENEFITS)?

Alchemy helps scientists make better products faster. Our modern laboratory management system functionality and AI-powered insights allows teams to run full digital research, development, testing, and commercialization.
