PRODUCT/SERVICE BACKGROUND INFORMATION

Daebong LS has created a new Upcycling Value from discarded citron seeds after manufacturing Korean citron tea. Daebong's Korean Citron Oil is naturally-derived Upcycling Oil without any solvent, containing abundant Vitamin, performs excellent absorption with light sensory, and confirmed anti-wrinkle, moisture retention and brightening effect by *in-vivo* test with the controlling of allergens.

Tremellan-MC Extract is a highly concentrated *Polysaccharide* derived from the finest *Tremella fuciformis*, separated through the sustainable method, and going through the 48 hours of incubation. It resulted in 4 times more increase in Mannose content compared to general Tremella fuciformis extract, with the result in moisturizing, anti-aging and anti-oxidant *in-vitro* result with *in-vivo* safety proven.

Gojiberry Kombu™ is a *postbiotics* ingredients manufactured through patented brewing technology inherited from Korean traditional methods. To fulfill the pure vegan fermentation, Daebong used 100% vegan yeast, boosting up the authentic active substances. The total content of *Protein*, *Betaine* and *Flavonoids* increased after fermentation, along with antioxidant, brightening, anti-aging and anti-inflammatory *in-vitro* and *in-vivo* safety proven.

WHAT IS THE COMPANY INTRODUCING TO THE MARKET/INDUSTRY?

Daebong LS specialized in cosmetics and pharmaceutical raw materials and is committed to be a company that provides the best solutions to enable people to live healthier and more beautiful lives through the motto of "Total Solutions for Human Better-Being".

HOW WILL THIS NEW PRODUCT/SERVICE IMPACT THE INDUSTRY (BENEFITS)?
