PRODUCT/SERVICE BACKGROUND INFORMATION

A medical product to treat burn victims becomes a skin care product in a new ingredient call ReCollagen.

Inventors of Re-Collagen include VP's of China Assoc. of Medical Equipment, Assoc. Medical Devices, MD. of China Society of Biomaterials & Chm. of China Assoc. of Medical Equipment Tissue Regeneration.

External Experts includes 5 Prof.s & PhD's with expertise in plastic surgery, reconstructive microsurgery & scar treatment, Dir for biological materials & published researchers. Internal RD team is comprised of a MS of Surgery, MS in Devt. Biology, PhD's in Biochemistry, Cell BS. & Crop Genetic Breeding.

ReCollagen is a science & medically driven skin care ingredient.

WHAT IS THE COMPANY INTRODUCING TO THE MARKET/INDUSTRY?

Re-Collagen ®Type III is a new skin care ingredient that is patented & an innovative solution to aging - a topical collagen product that helps rebuild lost collagen. It is 100% human identical, clinically tested to be 100% bioactive. It is also a non-animal, vegan form of collagen.

HOW WILL THIS NEW PRODUCT/SERVICE IMPACT THE INDUSTRY (BENEFITS)

Collagen is an ever-growing ingredient category in the skin care industry. It is most often collagen derived from an animal source. Clinically comparing Re-Collagen Type III to other forms of collagen prove major advantages of Re-Collagen over animal forms of collagen. The cell grown in Re-Collagen is faster than animal sourced collagen. Human collagen & Re-Collagen has a 100% amino acid sequence where Tuna Type I & III collagen is 65%, Sheep Type III collagen is only 89% & porcine & bovine are 90%. There is no equal to our product.

Finally, as Re-Collagen is vegan, it opens a new avenue of customers to our clients offering skin care.
