PRODUCT/SERVICE BACKGROUND INFORMATION

AA2G™ (Ascorbyl glucoside) is a stabilized vitamin C derivative with unique bioavailability that is manufactured by Hayashibara (a NAGASE Group company). NAGASE Specialty Materials proudly distributes AA2G™ for the US market in coordination with DKSH.

WHAT IS THE COMPANY INTRODUCING TO THE MARKET/INDUSTRY?

NAGASE Specialty Materials will be showcasing additional testing information on AA2G™. AA2G™ has proven long term stability and residual concentration, can reduce UV damage, and is effective for diverse skin types.

HOW WILL THIS NEW PRODUCT/SERVICE IMPACT THE INDUSTRY (BENEFITS)?

New test results showcase multiple benefits of AA2G™, including proven residual active concentration, pH stability, and color stability. AA2G™ is shown to be safe and effective for use as a brightening ingredient for diverse skin types, (ex: Fitzpatrick Skin Types 1-6).
