DensiFoll™: Bio-Active Technology to Improve Hair Density & Scalp Health

TRI-K Industries

tri-k.com

PRODUCT/SERVICE BACKGROUND INFORMATION

DensiFoll™ is a 99% naturally derived bioactive powered by plant stem cell exosomes designed to improve hair density and reinforce the scalp barrier. Studies using rinse-off and leave-on formulas showed it boosts eyebrow density, improves appearance of scalp hair loss, reduces scalp trans-epidermal water loss for better hydration, and enhances hair shine. Results prove that DensiFoll™ may stimulate follicular activity, improve scalp health, and enhance the appearance of healthy, lustrous hair.

WHAT IS THE COMPANY INTRODUCING TO THE MARKET/INDUSTRY?

Hair thinning is a growing global concern across genders and age groups, driving demand for solutions that deliver visible density and scalp health benefits. **DensiFoll™** is our novel bioactive complex designed to enhance the appearance of hair density while supporting overall scalp wellness. Backed by in-vitro and clinical data, **DensiFoll™** promotes visibly thicker, fuller-looking hair while reinforcing the scalp barrier and instantly improving shine and luster. This plant derived active offers a sustainable, high performing solution for advanced scalp and hair care formulations.

HOW WILL THIS NEW PRODUCT/SERVICE IMPACT THE INDUSTRY (BENEFITS)?

DensiFoll™ addresses market needs through clinically proven performance—showing a 25.4% reduction in visible hair loss after 90 days and a 14.69% improvement in eyebrow density within 8 weeks. It instantly enhances shine, while reducing trans-epidermal water loss, reinforcing the scalp barrier, and improving hydration. By combining proven efficacy with a high natural origin profile, DensiFoll™ sets a new standard for high performing scalp actives.
