

New generation of intelligent applicators that activate formulas at the moment of use

Nuon LLC

www.nuonmedical.com

PRODUCT/SERVICE BACKGROUND INFORMATION

Nuon Medical partners with cosmetic brands to transform product performance through integrated technologies. Specializing in applicator innovation, we embed features like microcurrent, light therapy, and microneedling into primary packaging to amplify formula effects. Every solution is custom-engineered using a reverse development approach, aligning seamlessly with brand identity and user expectations. Our mission is to make high-tech skincare effortless, intuitive, and results-driven—without changing the product inside.

WHAT IS THE COMPANY INTRODUCING TO THE MARKET/INDUSTRY?

Nuon Medical is introducing a new generation of intelligent applicators that activate formulas at the moment of use. By integrating proven skin technologies—such as low-level microcurrent, light, or thermal elements—directly into packaging, we help brands deliver enhanced results without altering the formulation. This approach bridges the gap between skincare and tech, enabling cosmetic products to offer measurable performance with minimal user effort.

HOW WILL THIS NEW PRODUCT/SERVICE IMPACT THE INDUSTRY (BENEFITS)?

Nuon Medical's smart applicators redefine how cosmetic brands engage consumers by enhancing product efficacy and user experience without reformulating. This innovation enables brands to differentiate in a crowded market through tangible performance improvements and elevated sensory appeal. By embedding advanced technologies into packaging, we support sustainable practices by reducing waste and extending product life cycles. Ultimately, our solutions empower brands to meet rising consumer demand for effective, tech-enabled skincare that is easy to use and clinically driven.
