TRIglyphix®Soothe: Delivering Immediate Soothing and Lasting Scalp Benefits

TRI-K Industries

www.tri-k.com

PRODUCT/SERVICE BACKGROUND INFORMATION

TRIglyphix® Soothe is a naturally derived scalp care active designed to deliver rapid scalp comfort and long-term scalp wellness. The technology targets pathways associated with scalp discomfort, sensitivity, and barrier disruption. Clinical studies demonstrated significant improvements in scalp comfort as early as Day 3, with continued benefits observed through Day 28. By providing both immediate soothing and sustained support for scalp health, TRIglyphix® Soothe helps promote a healthier, more balanced scalp environment and addresses the growing consumer demand for scalp-first solutions.

WHAT IS THE COMPANY INTRODUCING TO THE MARKET/INDUSTRY?

As scalp health becomes an increasingly important part of holistic beauty and personal care, consumers are seeking solutions that deliver both immediate relief and lasting benefits. TRIglyphix® Soothe introduces a science-led scalp wellness technology that targets complementary pathways associated with sensory comfort, inflammatory signaling, antioxidant defense, and cellular stress responses. This multi-mechanistic approach helps support a balanced scalp environment while addressing visible signs of scalp distress, including dryness, flaking, and redness. With a Natural Origin Index (NOI) of 0.99, it combines strong natural positioning with advanced scalp care science.

HOW WILL THIS NEW PRODUCT/SERVICE IMPACT THE INDUSTRY (BENEFITS)?

TRIglyphix® Soothe addresses a major unmet need in scalp care by delivering both rapid visible improvement and long-term scalp wellness benefits. In a placebo-controlled clinical study, scalp flaking was reduced by 39.6% and dryness by 23.1% after just 3 days, with improvements increasing to 52.1% and 28.6%, respectively, by Day 28. By end of the study, 88% of participants showed improved flaking and 92% demonstrated improved scalp hydration. This combination of fast-acting and sustained performance provides formulators with a clinically validated solution for addressing scalp discomfort, visible flakes, and dryness in next-generation scalp care products.
