STATEMENT OF GOALS

We all remember the excitement of our first SCC meeting, the venue, the speaker, who we met and the one take away. If we were not members prior to this meeting, we took the time to complete and submit our membership forms with our payments tucked in. Yes, all set and ready for the next meeting! At the end of the year, some of us discussed with our managers, the benefits of being an SCC member, we promptly renewed our membership with the support of our companies. Let's keep the enthusiasm and continue the renewal process every year.

Membership comes with many benefits and we are stronger in numbers, so as Area 1 Director, I would focus on increasing the number of renewals and as well as welcoming our new members. Visit us on line to see the many perks for being a member of the SCC.

Our membership also helps our local Chapters to be recognized at the National level. My goal will be to be the link between National and the Chapters, to maximize the benefits of both

I ask for your vote to represent you as Area I Director for 2019!!! Let's make it happen together. Membership is my priority.
